Profile

Developer by passion with specific skills in client-server applications, and distributed architectures. Engaged throughout the whole software development cycle, providing efficient solutions in software design and implementation with constant focus on user satisfaction.

Currently involved as technical leader, in an innovative EdTech company, I am looking for a challenging position in high-skilled development team, offering opportunities for career advancement.

Experience

Educlever - Senior software engineer : 2016 / now
We are building an innovative Learning Management System based on adaptive learning. As a technical leader in a development team of 8 persons, I am responsible of designing distributed APIs, building frontend web applications and delivering everything in a scalable infrastructure, from the architecture to the technical reviews.

CSTB - R&D engineer – 2006 / 2016
Working in a fast paced environment and producing a high volume of applications. Polyglot web developer, I was responsible for developing high skilled applications with agility, dealing both with big consortia and small technical teams.

Nice-Sophia Antipolis University – 2008 / 2010
POO and IHM teacher in Licence MIAGE, 110 hours per year.

Open source software - Author, member, contributor - 2004 / now
I've always pushed myself in personal projects and open source applications. Since 2010, I have been a member of the Woko framework, a full stack web framework for Java/JEE applications. More information is available on my GitHub page.

Education

MIAGE - Nice-Sophia Antipolis University - 2003 / 2006
Master degree in software engineering and management.

IUT - Nice-Sophia Antipolis University - 2001 / 2003
Two years Technical degree in Computer Science.

Skills

Software design, distributed architecture, micro frontends.
Sql/NoSql/Graph databases, ElasticSearch.
Pragmatic, agile and team player.
